*N/A means a number is not applicable or not available due to missing data.

*** means this API is calculated for a small school defined as having between 11 and 99 valid Stanford 9 test scores. APIs based on small numbers of students are less reliable and therefore should be carefully interpreted. Ranks, targets, and subgroup APIs are not calculated for small schools for this report.

means the school scored at or above 800 in 2000.

Missing schools – Some of the schools in the district may not appear on this list because APIs were not generated for them for one of the following reasons. Very small schools (fewer than 11 pupils with valid Stanford 9 test scores serving traditional student populations), special education schools and centers, and alternative, continuation, community day, court, community, and opportunity schools serving high-risk student populations are not in this system. These schools will participate in the alternative accountability system currently being developed. In addition, schools that had no Stanford 9 test results in 2000 will not receive a 2000 API Base report.

Explanatory Notes for the 2000 API Base Report contain more details about the displayed information.

This example shows the List of Schools for a district. A list of schools for each county office of education is also available in a similar format.
